

CLOUD COMPUTING

CAP 471-CA 2

Due Date: 04/04/2022

Set A

- Q.1 What are the available Web-Based Communication tools. Explain with example.
- Q.2 Create a to-do list for your class timetable from Monday to Saturday.
- Q.3 Consider 10 tasks with task size, 100, 120, 150, 90, 200, 200, 170, 190, 145, 125 MI, and 3 resources with resource speed 10, 12, 14, MIPS. Allocate the resources to task using OLB and MCT. Calculate Makespan and Average Resource Utilization.
- Q.4 What kind of Platform as a service is provided by Azure. Give examples of these services?

Set B

- Q.1 What are the available platforms to store and share data in the cloud? Give Examples? How can you share the data using Google Drive?
- Q.2 Create a to-do list for your routine timetable from Monday to Saturday.
- Q.3 Consider 10 tasks with task size, 150, 120, 170, 200, 90, 130, 145, 220, 125, 100 MI, and 3 resources with resource speed 8, 10, 12, MIPS. Allocate the resources to task using OLB and MCT. Calculate Makespan and Average Resource Utilization.
- Q.4 What kind of Software as a service is provided by Google Cloud. Give examples of these services?

Set C

- Q.1 What are the editing tools available in Google drive? Explain with examples.
- Q.2 Create a to-do list for your extracurricular activities from Monday to Saturday.
- Q.3 Consider 10 tasks with task size, 90, 100, 120, 230, 200, 150, 120, 175, 180, 100 MI, and 3 resources with resource speed 12, 14, 16, MIPS. Calculate Makespan and Average Resource Utilization.
- Q.4 What kind of Infrastructure as a service is provided by AWS. Give examples of these services?

Note:

- All questions are compulsory
- Scan it convert it into PDF and needs to be uploaded on UMS
- For all answers, you should write step by step procedure in a word file. Place appropriate screenshots wherever necessary.
