Course Title: Java Lab		Roll Number: RD2110B61	
Name: Atul Kumar		Registration Number: 12102801	
Assignment: 03	Page Number: 01	Total Pages: 04	

Question: Create a GUI app that finds the number of characters lines and words from JTextArea.

Answer: -

```
import javax.swing.*;
```

```
import java.awt.*;
```

```
import java.awt.event.*;
```

```
class CounterWord extends JFrame implements  
ActionListener{
```

```
    JTextArea inputTxt;
```

```
    JButton SubmitBtn;
```

```
    JLabel result1;
```

```
    JLabel result2;
```

```
    public CounterWord(){
```

```
        setTitle("Word Counter");
```

```
        setBounds(50,50,600,450);
```

```
        inputTxt = new JTextArea();
```

```
        inputTxt.setBounds(30,40,350,180);
```

```
inputTxt.setLineWrap(true);  
add(inputTxt);  
SubmitBtn = new JButton("Click Here");  
SubmitBtn.setBounds(50, 240,100,50);  
add(SubmitBtn);  
SubmitBtn.addActionListener(this);  
result1 = new JLabel();  
result1.setBounds(50,280, 400, 50);  
add(result1);  
result2 = new JLabel();  
result2.setBounds(50,340, 400, 50);  
add(result2);  
setResizable(false);  
setLayout(null);  
setVisible(true);  
}
```

```
public void actionPerformed(ActionEvent e){  
    String str = inputTxt.getText();  
    int Countline = 0;
```

```

char ch[]= new char[str.length()];
    for(int i=0;i<str.length();i++)
    {
        ch[i]= str.charAt(i);
        if( ((i>0)&&(ch[i]!=' ')&&(ch[i-1]==' ')) ||
((ch[0]!=' ')&&(i==0)) )
        {
            Countline++;
        }
    }

    result1.setText("Character Count : " +
str.length());
    result2.setText("Total Lines : " + Countline);
}

class MainClass{
    public static void main(String args[]){
        CounterWord fr = new CounterWord();
    }
}

```
