

CAP756 –D2110-Group 1 &Group 2--- Assignment 3

Submission Last Date: 22nd April 2022

Solve all the programs and copy & past in word file and convert it into pdf file upload it in UMS. (Save the pdf file as- "cap756_ca3_registrationnumber").

CAP756 – Assignment3 – SET—A

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React program to get the current date and time
- 2) Write a program in React js to determine whether a given year is a leap year in the Gregorian calendar.
- 3) Write a React program where the program takes a random integer between 1 to 10, the user is then prompted to input a guess number. If the user input matches with guess number, the program will display a message "Good " otherwise display a message "Not mapped"
- 4) Write a program in React jsto calculate days left until next New Year 2021.
- 5) Write a React program to check the total marks of a student in various examinations. The student will get A+ grade if the total marks are in the range 89..100 inclusive, if the examination is "Final-exam." the student will get A+ grade and total marks must be greater than or equal to 90. Return true if the student get A+ grade or false otherwise.
- 6) Write a program in React jsto calculate multiplication and division of two numbers (input from user).
- 7) Write a program in React jsto print the prime numbers from 1 to 50.

CAP756 – Assignment3 – SET—B

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React js program to check from two given integers, whether one is positive and another one is negative.
- 2) Write a React jsProgram to check whether a number entered by the user is even or odd.
- 3) Write a React js program to create a new string from a given string changing the position of first and last characters. The string length must be greater than or equal to 1.
- 4) Write a React js program to capitalize the first letter of each word of a given string.
- 5) Write a React jsProgram to apply the certain related string, numeric and password validations with suitable example
- 6) Write a React js to validate whether a given value type is boolean or not.
- 7) Write a React js to validate whether a given value type is null or not.

CAP756 – Assignment3 – SET—C

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React js to validate whether a given string type is null or not.
- 2) Write a React js program to filter out the specified values from a specified array. Return the original array without the filtered values.
- 3) Write a React jsProgram to read a number and to find the factorial of given number.
- 4) Write a React js program to extract out the values at the specified indexes from a specified array.
- 5) Write a React jsProgram to check whether the string entered by the user is palindrome or not, in the Alert Dialog box.
- 6) Write a React js program to calculate multiplication and division of two numbers (input from user).

- 7) Write a React js Program to apply the certain related string, numeric and password validations with suitable example

CAP756– Assignment3 – SET—D

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React js program to convert Hours into Seconds
- 2) Write a React js program to test the first character of a string is uppercase or not.
- 3) Write a React js program to find the Armstrong numbers of 3 digits.
- 4) Write a React js conditional statement to find the sign of product of three numbers. Display an alert box with the specified sign.
- 5) Write a React js conditional statement to sort three numbers. Display an alert box to show the result. Input : 29, -29, 0
- 6) Write a React js conditional statement to find the largest of five numbers. Display an alert box to show the result. Input : -9, -6, -3, 0, -78
- 7) Write a React js program to capitalize the first letter of each word of a given string.

CAP756 – Assignment3 – SET—E

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React js program to calculate multiplication and division of two numbers (input from user).
- 2) Write a React js Program to print the prime numbers from 1 to 50.
- 3) Write a React js program to convert temperatures to and from Fahrenheit, Celsius. Formula : $c/5 = (f-32)/9$ where c = temperature in Celsius and f = temperature in Fahrenheit
- 4) Write a React js program to get the difference between a given number and 100, if the number is greater than 100 return double the absolute difference.
- 5) Write a React js program to capitalize the first letter of each word of a given string.

- 6) Write a React jsProgram to apply the certain related string, numeric and password validations with suitable example
- 7) Write a React js conditional statement to find the largest of five numbers. Display an alert box to show the result. Input : -9, -6, -3, 0, -78

CAP756 – Assignment3 – SET—F

Answer any 5 questions

(5 X 6 = 30)

- 1) Write a React js Program to read a number and to find the factorial of given number.
- 2) Write a React js program to extract out the values at the specified indexes from a specified array.
- 3) Write a React js program to create a new string from a given string changing the position of first and last characters. The string length must be greater than or equal to 1.
- 4) Write a React js program to capitalize the first letter of each word of a given string.
- 5) Write a React js Program to apply the certain related string, numeric and password validations with suitable example
- 6) Write a React js program to create a new string from a given string changing the position of first and last characters. The string length must be greater than or equal to 1.
- 7) Write a React js program to capitalize the first letter of each word of a given string.
