

❖ Create table using Hive Editor

Step 1: First open the Cloudera Quickstart VM and then click on the web browser.

Step 2: Now click on the Hue option as shown in the screenshot.

Step 3: For creating new database click on the '+' icon as shown in the screenshot.

Step 4: Now, click on the down-arrow option that is just near the Query

Step 5: Now, follow the path as shown in the screenshot and click on the Hive Editor.

Step 6: Here we create a table having name 'emp' and having attribute- name, id and sal.

Step 7: Now in below screenshots, here we perform some simple query to extract the data from table.

Tables (1) T +

emp name (varchar(100)) id (varchar(10)) sal (float)

```
1 create table emp(name varchar(100), id varchar(10), sal float);
2
3
4 insert into table emp values('Emp1', '1001', 30000);
5 insert into table emp values('Emp2', '1002', 31000);
6 insert into table emp values('Emp3', '1003', 32000);
7 insert into table emp values('Emp4', '1004', 33000);
8
9 select *from emp;
10
11
12 select *from emp where sal>30500;
13
14
15 select *from emp where sal<31100;
16
```

Query History Saved Queries Results (2) Q ✓

emp.name	emp.id	emp.sal
1 Emp1	1001	30000
2 Emp2	1002	31000
