Q2: Use the file Google Sheets – Functions.xls as attached on LPU live.

- **Select the Challenge sheet.**

Answer: For selecting the challenge sheet you have to click on the challenge in the bottom of the sheet.

- **Fix the formula in cell C10 so it finds the average number of units sold by all of the troops.**

Answer: For finding the average the formula is:
`=AVERAGE(value1,[value2, ...])`

For this challenge sheet values are: -

`=AVERAGE(C3:C9)`

- **In cell C11, write a function that will find the total amount of units sold by all of the troops.**

Answer: For finding the total the formula is: -

`=SUM(value1,[value2, ...])`

For this challenge sheet values are: -

`=SUM(C3:C9)`

- In cell C12, write a function that will find the largest number of units sold by a troop.

Answer: For finding the largest number the formula is: -

=MAX(value1,[value2, ...])

For this challenge sheet values are: -

=MAX(C3:C9)

- In cell C13, write a function that will find the smallest number of units sold by a troop.

Answer: For finding the largest number the formula is: -

=MIN(value1,[value2, ...])

For this challenge sheet values are: -

=MIN(C3:C9)

- **In cell C14, write a function that will count the total number of units sold by a troop.**

Answer: For finding the largest number the formula is: -

=COUNT(value1,[value2, ...])

For this challenge sheet values are: -

=COUNT(C3:C9)

Q3: Use the file Google Sheets - Google Sheets - Modifying Cells as attached on LPU live.

<https://docs.google.com/spreadsheets/d/1tAtDc6gBd78Eaktbj7PEwjklA0R5fpJ/edit?usp=sharing&oid=102047254705245503044&rtpof=true&sd=true>

- **Change the row height of all the rows to be smaller.**

Answer: For changing the row size: -

1. First you have to select the row.
2. Hover the mouse over the line between two rows.
3. Click and drag the row border to modify the height.
4. Release the mouse when you are satisfied with the new row height.

- **Merge cells A1:I1.**

Answer: For merging the cells: -

1. Select the cells which you want to merge.
2. Now click on format.
3. Merge cells.

- **Insert a row below row 11 and type your name in the first cell.**

Answer: For inserting row below: -

1. Select the row 11.

2. Right-click on the row.
3. From the menu that appears select insert below.
4. Now type your name in the row.

- **Delete row 7. This row contains the name, Ben Mathis.**

Answer: For deleting row: -

1. Select the row 7.
2. Right-click on the selected row.
3. Click on delete row.

- **Insert a column between columns G and H and type Total Quantity as the column header.**

Answer: For inserting column: -

1. Right-click on column G.
2. Click on Insert one column right.
3. Now you can type Total Quantity as the column header.

- **Select cells A2:J2, change them to wrap text, and centre align them.**

Answer: For wrapping text: -

1. Drag your mouse from A2 to J2 for selecting.
2. Click on Format.
3. Select text wrapping.
4. Select wrap.

- **Freeze the top two rows.**

Answer: For freezing the rows: -

1. Select the top 2 rows by dragging the mouse with left-click.
2. Now click on View.
3. Click on Freeze.
4. Click on Upto 2 rows.
