Q3. Explain what is Bootstrap and what are the key components of Bootstrap with an example program?

Ans. Bootstrap is the most popular HTML, CSS and JavaScript framework for developing a responsive and mobile friendly website. It is absolutely free to download and use. It is a front-end framework used for easier and faster web development. It includes HTML and CSS based design templates for typography, forms, buttons, tables, navigation, modals, image carousels and many more. It can also use JavaScript. It facilitates you to create responsive designs. It is compatible on most of browsers like Chrome, Firefox, Internet Explorer, Safari and Opera etc.

List of components of Bootstrap:-

① Jumbotron: It simply put extra attention to particular content or information by making it larger and more eye-catching.

- ② Alerts: It is a popup with predefined message that appears after a particular action.
- ③ Buttons: It is customized buttons that are used to perform an action in the form etc.
- ④ Button group: It is a group of buttons aligned in a single line and they can be arranged both vertically & horizontally.
- ⑤ Badge: It is a labeling component that is used to add additional information.
- ⑥ Progress Bar: It is used to show the progress of a particular operation with a custom progress bar.
- ⑦ Spinner: The spinner displays the loading state of websites or projects.
- ⑧ Scrollspy: It keeps updating the navigation bar to the currently active link based on the scroll position.
- ⑨ List group: It is used to display an unordered series of content in a proper way.
- ⑩ Media Object: The Media object is used for repetitive and complex components like tweets or blogs. The images or videos are placed/aligned to the left or the right of the content.

```

EX: <!DOCTYPE html>
<html lang="en">
<head>
  <title> Bootstrap Example </title>
  <meta charset="utf-8"/>
  <meta name="viewport" content="
    width=device-width, initial-scale=1"/>
  <link
    rel="stylesheet" href="http://maxcdn.
bootstrapcdn.com/bootstrap/4.5.2/css/bootstrap.
min.css"/>
</head>
<body>
  <div class="container">
    <div class="jumbotron">
      <h1 class="text-center text-success">
        Bootstrap Jumbotron Example
      </h1>
      <h2> About Bootstrap </h2>
    </div>
    <p>
      Bootstrap is a free and open-
      source tool collection for creating
      responsive websites and web
      applications. It is the most

```

popular HTML, CSS and Javascript framework for developing responsive, mobile-first websites.
